

OUR MISSION STATEMENT

TACRON TWELVE will provide tactical air control of aircraft at sea and ashore from Tactical Air Control Centers (TACC) and Expeditionary Advance Bases (EAB) that enable aircrews to deliver mission packages on time and on target.

OUR VISION

Deploy the BEST TRAINED AND MOST PROFICIENT Combat Air Controllers and TACC teams in the Navy.

OUR INTENT

All Talons will be relentlessly trained and supremely prepared to execute combat and non-combat operations both at sea and ashore by focusing on the following lines of effort:

| WARFIGHTING READINESS | INNOVATION AND INTEGRATION | CULTURE OF EXCELLENCE |
|---|--|---|
| <p>Talons will maintain a 'Ready to Fight Tonight' mentality.</p> <p>Conduct steady-strain training events designed to advance Sailors across the continuum of apprentice to mastery.</p> <p>Generate proficient, combat ready air controllers and flow them to the point of need at pace.</p> <p>"First to Fight"</p> | <p>Talons will execute deliberate integration events with USN, USMC, and Joint counterparts to validate and advance the tactics, techniques, and procedures to deliver decisive combat air power.</p> <p>Explore new ways to modernize TACC capability.</p> <p>Establish what the Talon 'High End Fight' looks like.</p> <p>"Assess, Innovate, Execute"</p> | <p>Talons have a bias for action – are self-reliant and solution-minded – always looking for how we can make things better.</p> <p>Every Talon plays a critical role in forging our combined character, competency, and connectedness.</p> <p>Talons will thrive through Trust, Transparency, and Teamwork.</p> <p>"Deeds Not Words"</p> |

"CONTROL, COORDINATE, FIGHT & WIN!"
